Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

09/977,880

Applicant(s)

HOLDSTOCK ET AL.

Examiner

William K. Cheung

Art Unit

1713

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 March 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-6 and 9-30 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-6 and 9-30 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date 012907.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____.

DETAILED ACTION

Request for Continued Examination

1. The request filed on March 22, 2007 for a Request for Continued Examination (RCE) under 37 CFR 1.53(d) based on parent Application No. 09/977,880 is acceptable and a RCE has been established. An action on the RCE follows.
2. In view of the amendment filed March 22, 2007, new claims 23-30 have been added. Claims 1-6, 9-30 are pending.
3. In view of the IDS filed January 29, 2007, the IDS issue is moot.
4. In view of the amendment filed March 22, 2007, the rejection of Claims 1-6, 9-22 under 35 U.S.C. 103(a) as being unpatentable over Mancini et al. (US 4,056,496) in view of Mitra et al. (US 5,212,015), is withdrawn.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

Art Unit: 1713

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 27-28 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claim 27 (line 2), the recitation "immobilized alkali" is considered non-enabling. Although applicants' specification (page 7) disclose that "immobilized alkali" is an "immobilized hydroxide", which can be Amberjet 4400 (OH), however, there is no indication that Amberjet 4400 comprises an alkali metal. Therefore, in view of lack of teachings for enabling "immobilized alkali", the examiner has a reasonable basis that the invention of claims 27-28 are considered non-enabling, for one of ordinary skill in art to make/use the invention as claimed.

Claim Rejections - 35 USC § 112

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claim 24 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1713

Claim 24 (line 2), the recitation "P-C(O)-Q)" is considered indefinite. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

10. Claims 1-6, 9-26, 29, 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mancini et al. (US 4,056,496) in view of Mitra et al. (US 5,212,015) as evident in Goto et al. (US 3,845,164), and Williamson et al. (US 6,239,298).

Mancini et al. (col. 3, line 32-48) disclose the deketalization of a compound that is substantially identical to the chemical of Formula II as claimed with a strong acid.

Art Unit: 1713

Mancini et al. (col. 3, line 50 to col. 4, line 3) in example 1 clearly indicate the use of concentrated sulfuric acid for the deketalization process, which is also followed by a filtration process.

The difference between the invention of claims 1-6, 9-26, 29, 30 and Mancini et al. is that Mancini et al. are silent on using an immobilized acid for the disclosed deketalization process.

Mitra et al. (col. 18, Example 21) disclose a process to deketalize an organic compound. Since both Mancini et al. and Mitra et al. are both related to the same endeavor of deketalizing organic compounds, it would have been obvious to one of ordinary skill in art to appreciate and combine the deketalization teachings in Mitra et al. and Mancini et al. Further, motivated by the expectation of success of obtaining compounds that are of high purity with Amberlyst-15, which is an immobilized acid (Mitra et al., col. 18, Example 21) comprising sulfonic acid functionalities which are highly acidic by nature, it would have been obvious to one of ordinary skill in art to incorporate the immobilized acid teachings of Mitra et al. into Mancini et al. to obtain the invention of claims 1-6, 9-26, 29, 30.

Regarding the claimed side reaction products, an acrylic acid and a crosslinker, applicants must recognize that deketalized product of Mancini et al. are prompt to side reactions in the presence of a strong acid such as the concentrated sulfuric acid of

Art Unit: 1713

Mancini et al. or the Amberlyst-15 of Mitra et al. In the presence of a strong acid, the hydrolysis of the deketalized product of Mancini et al. would readily lead to the formation of acrylic acid or methacrylic acid as claimed, which is affirmed by the reference to Goto et al. (col. 4, line 34-37). After reviewing the reference to Goto et al., it would not be difficult to one of ordinary skill to recognize that the deketalization of Mancini et al. comprises side reaction products, such as acrylic acid or methacrylic acid as claimed.

In view of the reasons set forth above, reaction mixture as disclosed in Mancini et al. clearly disclose a reactive mixture comprising deketalized product of Mancini et al. and acrylic acid or methacrylic acid. In view of the teachings of Williamson et al. (col. 2, line 40-49), it is clearly that the esterification reaction can readily occur between an alcohol (glycerol) and a free carboxylic acid (acrylic acid) in the presence of a strong acid (sulfuric acid) (col. 3, line 9-14). Therefore, after reviewing the reference to Williamson et al. it would not be difficult to one of ordinary skill to recognize the esterification reaction product produced by the reaction of the deketalization of Mancini et al. with the side reaction products, such as acrylic acid or methacrylic acid, to obtain the crosslinker as claimed.

Regarding the claimed "0.50 percent of less of crosslinker" of claim 23, the "essentially quantitative conversion" of claim 25, the "5% or less of a polymer formed by polymerization of said crosslinker" of claim 26, in view of the substantially identical type of reaction as disclosed in the prior art and the reaction type as claimed, the examiner

Art Unit: 1713

has a reasonable basis that the claimed amount of side reaction product or the "essentially quantitative conversion" are inherently possessed in Mancini et al. and Mitra et al.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William K. Cheung whose telephone number is (571) 272-1097. The examiner can normally be reached on Monday-Friday 9:00AM to 2:00PM; 4:00PM to 8:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David WU can be reached on (571) 272-1114. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 1713

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
